

# zSpace Learning Station Inspire & Inspire Pro Editions

High performance simulation station for AR/VR instruction in science, math, and CTE that supports advanced professional applications and gaming, including eSports, modeling and simulation, and data visualization.

## Software & Learning Activities

Learning applications supported by standards-based experiential learning activities and simulations to support:

- Elementary and middle grades STEAM
- High school science and math
- Postsecondary science and math
- Career and technical education (CTE) programs

## Hardware

The zSpace Inspire includes the device and stylus to deliver an immersive and interactive learning experience in virtual and augmented reality without an HMD or glasses. Experience a level of realism like never before with advanced 4K True Color visuals.

## Services

Services to support implementation of zSpace include:

- On-boarding and installation support
- Professional development
- Access to lessons plans, online courses, webinars, and the zSpace Teacher Community
- IT support
