Select your brush type and color

Change your brush length and size

Additional tools

Eraser — Erases brush strokes

Eyedropper — Sets the active brush color by selecting existing brush stroke

Recolor — Colors existing brush strokes with the current palette color

Environment — Shows alternative environments to pick from

Selection — Enables selection of multiple brush strokes to move them

Mirror — Activates a mirror plane that subsequent brush strokes can be mirrored across

Straightedge — Activates a mode in which brush strokes are drawn straight

Tips:
You can undo and redo brush strokes.
By moving the stylus near a panel, the stylus beam will become underlaid by a solid blue line signaling that you can use it to grab a panel. You can then move the panels around the screen.
